2. Basis of Preparation (Continued)

d) Use of estimates and judgements

The preparation of financial statements in accordance with International Financial Reporting Standards (IFRS) requires management to make estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about critical judgements in applying accounting policies that have the most significant effect on the amounts recognized in the condensed consolidated interim financial statements include: useful lives of property, plant and equipment and the customer loyalty program.

3. Significant Accounting Policies

The accounting policies applied by SaskGaming in these condensed consolidated interim financial statements are consistent with those applied by SaskGaming in its March 31, 2018 financial statements.

4. Fair Value

Fair values approximate amounts at which financial instruments could be exchanged in an orderly transaction between market participants based on current markets for instruments with similar characteristics such as risk and remaining maturities. Fair value measurements are subjective in nature, and represent point-in-time estimates which may not reflect fair value in the future.

The methods and assumptions used to develop fair value measurements have been prioritized into three levels as per the fair value hierarchy included in IFRS. Level one includes quoted prices (unadjusted) in active markets for identical assets or liabilities. Level two includes inputs other than quoted prices included in Level one that are observable for the asset or liability. Level three includes inputs that are not based on observable market data.

The fair values of the finance lease obligation is estimated by discounting the expected future cash flows using the interest rate of a Government of Canada bond with similar terms, adjusted for an appropriate risk premium.
